

# What is the weight of photovoltaic panels per square meter

## Overview

---

On average, solar panels weigh between 10 and 20 pounds per square meter. The weight doesn't spread evenly across the surface of your solar panel. This weight makes them manageable, but still requires careful lifting during installation. Why is knowing the. These panels cover an area of 17. 62 square feet and weigh around 40 pounds, excluding the weight of frames and mounting equipment.
