## Photovoltaics : new materials for better efficiency

The global solar energy market today is 95% silicon-based - although, silicon is not actually the most ideal material for photovoltaic panels because it does not absorb light very well. Researchers are ...

## The Best Roof Materials for Solar Panels - 5 Common Materials

Solar panels can be installed on almost any type of roof, but there are indeed some materials that are unsuitable or

impractical. So the question arises:  
which roofing material is most suitable  
for solar ...
