

# What s special about double-glass solar panels

## Overview

---

Double-glass panels consist of two layers of glass, 2. They offer enhanced durability compared to traditional panels, 3. There has recently been a worldwide trend to put glass on both sides of the panel and the name given is known as double glass solar panels. The double glass module, as the name implies, is a construction. Choosing between dual-glass and conventional solar panels requires careful analysis of your environment, budget, and timeline. While traditional solar panels dominate the market, double-glass technology is gaining traction for.
