

# What to do if the photovoltaic panel surface is frozen

## Overview

---

If solar panels become frozen, several steps can be taken to mitigate the situation and restore efficiency. Avoid direct contact with the panels, 3. Utilize a heater or de-icing agent. Assessing the conditions involves checking the. The first step to protecting photovoltaic panels from adverse weather conditions is to opt for products made from durable, high-quality materials. UL 61730 or IEC 61215 certified panels, for example, undergo rigorous resistance tests against frost, snow and even hail. From simple adjustments during installation to high-tech solutions, we've got you covered. Safety first, ensure you are not in danger from falling icicles or ice, secure your own safety first. Allow natural thawing to occur, the sun may gradually melt the ice without intervention.
