Equipment

All public emergency services in Germany (i.e. EMS, fire, police, disaster response) use the same radio system for communication. Thus, they can connect to each other with their radio equipment. Since the 1950s the units were equipped with radios in the 4m frequency band, handheld units work in the 2m band. This analog radio usage is protected by law for emergency use only. Relay stations cover whole Germany. With entering the appropriate channel, every radio can reach another dispatch center...
