

# Where solar power is used

## Overview

---

Solar power, also known as solar electricity, is the conversion of energy from into, either directly using (PV) or indirectly using . use the to convert light into an . Concentrated solar power systems use or mirrors and systems to focus a large area of sunlight to a hot spot, often to drive a .

## Where solar power is used

---

### Which countries use the most solar energy? [ ]

Our rundown of the countries around the world using the most solar energy, from Mexico to China. What kind of home do you live in? China consumes more solar energy than any other ...

[Learn More](#)

### How Does Solar Work?

Solar technologies convert sunlight into electrical energy either through photovoltaic (PV) panels or through mirrors that concentrate solar radiation. This energy can be used to generate electricity or be ...
