

# Which kind of home solar panels is better

## WORKING PRINCIPLE

## Overview

---

Monocrystalline solar panels offer the best performance with 20% or higher efficiency rates and 25-35 year lifespans, though they cost more than polycrystalline panels which provide 15-17% efficiency at lower prices. Solar panels reduce energy costs by capturing sunlight, but choosing the best solar panels for homes is essential due to their high cost. What Are the Best Solar Panels for. Discover the six main types of solar panel, including thin-film, perovskite, and the best type for your home: monocrystalline. When deciding, consider factors like your budget, roof size, sun exposure, and energy efficiency goals.
