## Overview

---

Asia Pacific led the global market with the largest market share of 36% in 2025. 69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436. 30%. Global solar installations reached nearly 600 GW – an impressive 33% increase over the previous year – setting yet another record. Solar accounted for 81% of all new renewable energy capacity added worldwide. While remaining a modest contributor to overall electricity generation for now, solar's. Solar photovoltaics is one of the most cost-effective technologies for electricity generation and therefore its use is growing rapidly across the globe.

## World solar power market share

---

### Global Market Outlook for Solar Power 2025-2029

Regarding global power generation, solar nearly doubled its share over the past 3 years, growing by 1.3 percentage points only last year to a 7% share in the world's electricity mix.
