

# Xinzhou Solar Photovoltaic Power Generation Project

## Overview

---

Solargiga Energy's Shanxi Xinzhou PV Project (the "Project") is a large-scale mountainous centralized PV power project. Nestled in steep and rugged terrain with deep valleys and bathed in abundant sunlight, nearly 110,000 PV modules weave poetry across layer upon layer of mountains. In early 2025, the 50MW PV Power Generation Project in Xinfu District, Xinzhou City, Shanxi Province with Solargiga Energy Holdings Limited (hereinafter referred to as "Solargiga Energy") as its Supplier achieved full-capacity grid connection and power generation. It is planned in Shanxi, China. According to GlobalData, who tracks and profiles over 170,000 power plants worldwide, the project is currently at the permitting stage. Read more about Solar capacity ratings. 7022°E in the Northern Temperate Zone, presents a varied landscape for solar energy generation throughout the year. This location experiences distinct seasonal fluctuations in solar output, which significantly impact the effectiveness of. [Xinzhou 100,000-kilowatt photovoltaic power station project started] On April 26, the 100,000-kilowatt photovoltaic power station project in Yanmen, Dai County, Xinzhou City, undertaken by Shanxi Construction Investment Construction Group Co., officially started construction.
