

# Zimbabwe energy storage low temperature lithium battery factory

**5** Years warranty

## Overview

---

The Harare Institute of Technology (HIT) is moving to establish a lithium processing plant, a strategic initiative designed to position Zimbabwe as a central hub in the global battery value chain, drive domestic value addition, and accelerate industrialisation in line with the. The Harare Institute of Technology (HIT) is moving to establish a lithium processing plant, a strategic initiative designed to position Zimbabwe as a central hub in the global battery value chain, drive domestic value addition, and accelerate industrialisation in line with the. The Harare Institute of Technology (HIT) is moving to establish a lithium processing plant, a strategic initiative designed to position Zimbabwe as a central hub in the global battery value chain, drive domestic value addition, and accelerate industrialisation in line with the country's National. The project will be managed by a Zimbabwean lithium producer in partnership with a China-based company involved in the manufacturing of new energy lithium battery materials. Zimbabwe is set to start operations at what is the continent's first lithium sulphate plant within this year. The project is. Africa's lithium sector development has accelerated beyond mineral extraction into sophisticated value-addition frameworks that reshape global battery supply chain dynamics. -Reduce reliance on fossil fuel imports. -Secure 5000MW of new capacity to meet industrial and residential growth.
