

Zuva Zuva Solar Plant in Hungary

Overview

The solar power plant, which is located near Kapuvár on a 220,000-square-meter industrial site, will offer electricity to about 10,000 houses and 30,000 individuals for the next 25 years. Solar power in Hungary has been rapidly advancing due to government support and declining system prices. 8 GW of photovoltaics capacity, a massive increase from a decade prior. [1] Solar power accounted for 24.8% of the country's electricity generation in. According to plans, the Kaba Solar Park, located on 70 hectares and using more than 97 thousand solar panels, will start commercial production at the end of 2020. MVM Zöld Generáció Kft. In addition to the multiplication of the 0. In the first ten months of this year, the country was able to install an additional capacity of around 1,500 MW of solar systems. This number significantly exceeds the previous year's. It is a strategic goal of the Hungarian government to increase the share of renewable power generation.
